

## 2025 Fee Schedule

Average 2025 fee rates increased by 12.7% with increased supplied tonnes partially offsetting the total fee budget increase. Generally, material fee rate changes are most significant for those categories with the highest commodity revenue per tonne.

This is because these materials receive a larger share of commodity revenue in Step 2 of the fee-setting process compared to their relative share of gross cost allocation in Step 1. Fee rate changes for materials notably above the average increase include Newsprint, Other Printed Paper, Paper Laminates and Rigid Polystyrene. Categories with below average rate changes include Aluminum Food and Other Containers and HDPE Bottles.
